Disruptive: Rewriting the rules of physics By Steven B Bryant

Once in a lifetime we might witness a scientific event so rare and revolutionary that it changes our lives forever. Imagine awakening on the day in history when we learned that the Earth is round, not flat; or awakening on the day we learned that the planets orbit the Sun, not the Earth. Now, imagine awakening tomorrow to learn that Einstein's theory of relativity is wrong!

Demonstrating that Einstein’s theory is wrong is a tall order. Undaunted, author Steven B. Bryant doesn’t simply prove relativity wrong, he shows that relativity theory was never correct in the first place. Unencumbered by relativity, Bryant introduces Modern Mechanics, his new unified theory that is easy to understand and more accurate than Einstein’s theory of relativity. In **Disruptive**, you’ll learn:

- Where Einstein makes several mistakes that invalidate relativity theory and why these mistakes were not previously found.
- Why Modern Mechanics is a unified model that is more accurate than relativity theory.
- How Einstein’s theory can be wrong and still provide useful – but no longer the most accurate – answers.
- How Modern Mechanics is one theory that explains experiments that previously required three: classical mechanics, relativity theory, and quantum mechanics.
- How Modern Mechanics supports faster–than–light travel and communication.

Disruptive is a thought–provoking book that will fundamentally transform our understanding of physics, forever changing the way we view space and time.

Editorial Review

About the Author
Steven B. Bryant is a subject matter leader in the relativity community of the Natural Philosophy Alliance (NPA). He has published several papers challenging Einstein's theory of relativity, and has spoken at American Association for the Advancement of Science (AAAS) and NPA conferences at universities across the United States. Steven holds a BS in Computer Science from San Diego State University and an MBA from the University of San Diego. He lives in the San Francisco Bay Area with his wife and daughter.

Users Review

From reader reviews:

Gregory Mendoza:

The particular book Disruptive: Rewriting the rules of physics has a lot associated with on it. So when you make sure to read this book you can get a lot of profit. The book was authored by the very famous author. Mcdougal makes some research before write this book. This book very easy to read you can obtain the point easily after perusing this book.

Leah Pelton:

Reading can called imagination hangout, why? Because when you are reading a book especially book entitled Disruptive: Rewriting the rules of physics your thoughts will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely might be your mind friends. Imaging every word written in a publication then become one form conclusion and explanation in which maybe you never get just before. The Disruptive: Rewriting the rules of physics giving you a different experience more than blown away your thoughts but also giving you useful data for your better life within this era. So now let us show you the relaxing pattern at this point is your body and mind is going to be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

Joshua Smith:

Do you have something that you prefer such as book? The guide lovers usually prefer to decide on book like comic, brief story and the biggest the first is novel. Now, why not seeking Disruptive: Rewriting the rules of physics that give your fun preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the way for people to know world much better then how they react to the world. It can't be explained constantly that reading routine only for the geeky man or woman but for all of you who wants to possibly be success person. So , for all of you who want to start looking at as your good habit, you could pick Disruptive: Rewriting the rules of physics become your personal starter.

Michael Mantz:

Reading a book to be new life style in this calendar year; every people loves to go through a book. When you learn a book you can get a large amount of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. In order to get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, along with soon. The Disruptive: Rewriting the rules of physics will give you new experience in reading through a book.
