Key Concepts in Geomorphology By Paul R. Bierman, David R. Montgomery

Written for introductory geomorphology courses, *Key Concepts in Geomorphology* offers an integrative, applications-centered approach to the study of the Earth's dynamic surface. Bierman and Montgomery draw from the fields of physics, chemistry, biology, and mathematics to help students get a basic understanding of Earth surface processes and the evolution of topography over short and long timescales. The authors also hone in on practical applications, showing how scientists are using geomorphological research to tackle critical societal issues (natural disaster response, safer infrastructure, protecting species, and more).

Editorial Review

About the Author
Paul Bierman is professor of Geology and Natural Resources at the University of Vermont, USA. His research and teaching expertise focus on the interaction of people and Earths dynamic surface. His research includes tracing the history of the Greenland Ice sheet over the last million years and creating the first record of storminess and erosion that extended back over the last 10,000 years in Vermont, New Hampshire, and New York. David R. Montgomery is a professor at the University of Washington, USA.

Users Review

From reader reviews:

William Phillips:

What do you ponder on book? It is just for students since they are still students or the idea for all people in the world, the particular best subject for that? Only you can be answered for that problem above. Every person has diverse personality and hobby for each and every other. Don't to be forced someone or something that they don't need do that. You must know how great along with important the book Key Concepts in Geomorphology. All type of book is it possible to see on many resources. You can look for the internet solutions or other social media.

Sharon Keller:

As people who live in the modest era should be upgrade about what going on or details even knowledge to make all of them keep up with the era that is certainly always change and advance. Some of you maybe will probably update themselves by reading through books. It is a good choice for you but the problems coming to you is you don't know which you should start with. This Key Concepts in Geomorphology is our recommendation so you keep up with the world. Why, because this book serves what you want and need in this era.

Cruz Fleury:

This book untitled Key Concepts in Geomorphology to be one of several books that best seller in this year, this is because when you read this e-book you can get a lot of benefit onto it. You will easily to buy this specific book in the book retailer or you can order it by using online. The publisher of the book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Smart phone. So there is no reason for your requirements to past this reserve from your list.

Kim Nielsen:

Playing with family within a park, coming to see the sea world or hanging out with buddies is thing that usually you may have done when you have spare time, then why you don't try issue that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Key Concepts in Geomorphology, it is possible to enjoy both. It is excellent combination right, you still would like to miss it? What kind of hangout type is it? Oh seriously its mind hangout men. What? Still don't get it, oh come on its referred to as reading friends.
