Scientific Design of Exhaust and Intake Systems (Engineering and Performance) By Philip Hubert Smith, Phillip H. Smith, John C. Morrison

For years, engineers, engine designers, high-performance tuners and racers have depended on the Scientific Design of Exhaust and Intake Systems to develop maximum potential from their engines. Dr. John C. Morrison is one of the foremost authorities on the analysis of the induction and exhaust processes of high-speed engines. Together with Philip Smith, he gives a thorough explanation of the physics that govern the behavior of gases as they pass through an engine, and the theories and practical research methods used in designing more efficient induction manifolds and exhaust systems, for both competition and street use. Chapter topics range from Simple Flow Problems and Sound and its Energy to Designing a System for Racing. This authoritative book will lead you through the complex theory to an understanding of how to design high-performance exhaust and intake systems for your own particular application.

From reader reviews:

Nicole Garner:

Book is to be different for every single grade. Book for children until finally adult are different content. As it is known to us that book is very important for us. The book Scientific Design of Exhaust and Intake Systems (Engineering and Performance) was making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The book Scientific Design of Exhaust and Intake Systems (Engineering and Performance) is not only giving you much more new information but also to get your friend when you sense bored. You can spend your personal spend time to read your e-book. Try to make relationship together with the book Scientific Design of Exhaust and Intake Systems (Engineering and Performance). You never feel lose out for everything if you read some books.

Jennifer Games:

A lot of people always spent all their free time to vacation as well as go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent these people free time just watching TV, or playing video games all day long. In order to try to find a new activity honestly, that is look different you can read a book.
