Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results By Larry Hatcher

Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results* is the simple, nontechnical introduction to the most complex multivariate statistics presented in empirical research articles**. It demystifies the sophisticated statistics that stop most readers cold: multiple regression, logistic regression, discriminant analysis, ANOVA, ANCOVA, MANOVA, factor analysis, path analysis, structural equation modeling, meta-analysis--and more. *Advanced Statistics in Research* does not show how to *perform* statistical procedures--**it shows how to read**, **understand**, **and interpret** them, as they are typically presented in journal articles and research reports. A companion website, ***StatsInResearch.com, provides free sample chapters, exercises, and PowerPoint slides for students and teachers. A free 600-item test bank is available to instructors.

Advanced Statistics in Research assumes that you have never had a course in statistics. It begins at the beginning, with research design, central tendency, variability, *z* scores, and the normal curve. You will learn (or re-learn) the big-three results that are common to most procedures: statistical significance, confidence intervals, and effect size. Step-by-step, each chapter gently builds on earlier concepts. **Matrix algebra is avoided, and complex topics are explained using simple, easy-to-understand examples**.

Need help writing up your results? Advanced Statistics in Research shows how data-analysis results can be summarized in text, tables, and figures according to APA format. You will see how to present the basics (e.g., means and standard deviations) as well as the advanced (e.g., factor patterns, post-hoc tests, path models, and more).

Advanced Statistics in Research is appropriate as a textbook for graduate students and upper-level undergraduates (see supplementary materials at *StatsInResearch.com*). It also serves as a handy shelf reference for investigators and all consumers of research.

Editorial Review

Users Review

From reader reviews:

Robert Rios:

Here thing why this particular Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results are different and dependable to be yours. First of all examining a book is good but it depends in the content than it which is the content is as yummy as food or not. Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results giving you information deeper and different ways, you can find any reserve out there but there is no book that similar with Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results. It gives you thrill studying journey, its open up your personal eyes about the thing that happened in the world which is might be can be happened around you. You can actually bring everywhere like in park, café, or even in your means home by train. If you are having difficulties in bringing the printed book maybe the form of Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results in e-book can be your alternate.

David Veal:

Beside this kind of Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you might got here is fresh through the oven so don't possibly be worry if you feel like an older people live in narrow town. It is good thing to have Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results because this book offers to you personally readable information. Do you oftentimes have book but you don't get what it's all about. Oh come on, that would not happen if you have this in your hand. The Enjoyable blend here cannot be questionable, like treasuring beautiful island. Use you still want to miss that? Find this book as well as read it from right now!

Jane Rich:

This Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results is brand new way for you who has interest to look for some information because it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or else you who still having little bit of digest in reading this Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results can be the light food for you personally because the information inside that book is easy to get by anyone. These books develop itself in the form and that is reachable by anyone, yep I mean in the e-book application form. People who think that in publication form make them feel sleepy even dizzy this reserve is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss this! Just read this e-book sort for your better life as well as knowledge.

Cheryl Thornton:

What is your hobby? Have you heard which question when you got scholars? We believe that that problem was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And you know that little person similar to reading or as looking at become their hobby. You need to know that reading is very important and also book as to be the matter. Book is important thing to include you knowledge, except your own teacher or lecturer. You discover good news or update with regards to something by book. Many kinds of books that can you take to be your object. One of them is actually Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results.
