Convicted: A Scientist Examines the Evidence for Christianity By Brad Harrub, Ph.D.

Few scientists are willing to uncover the problems with evolution. Fewer still will boldly reveal the evidence that exists for the creation account. In this book Dr. Brad Harrub blows the lid off of the usual evolutionary dogma! This neuroscientist boldly details the evidence that exists for Christianity. Having walked through the halls of academia Dr. Harrub knows first hand the evolutionary icons and indoctrination practices used in the classroom. He has turned his scientific training against the very evolutionary theory that many defend as their own religion. This is a comprehensive book begins with the question of whether or not there is a God--using arguments of logic and reason to prove His existence. It is an excellent tool to teach why we believe what we believe. The book was professionally laid out, and was printed in full-color throughout. It contains multiple pictures, graphs, and tables to make it easy to understand. Not only does this resource cover the foundational principles like the existence of God, inspiraiton of the Bible, the deity of Christ, and creation vs. evolution, this book also covers topics that have received very little attention--many of which are issues that many Christians struggle with. For instance, this book also discusses worldviews, the Ice Age, radiocarbon dating (in an easy to understand format) and the question of distant starlight and time. The author declared: "After years of careful and deliberate study and research, there is one thing I know for certain. Not only am I convinced... I'm convicted!" Brad Harrub, Ph.D.

Editorial Review

Review
I just finished reading Convicted. Thank you for taking the time to write it. It is fascinating and informative. It puts all of the information that I need in one place. I am fortunate enough to be able to send my children (so far) to a private school where they are taught the truth about creation. I am worried about what will happen to them when they have to go to college. This book will help out greatly! --Lt. Franklin P. McQuage Jr.

Thank you so much for the book Convicted! I have just finished reading it and I think it is great. I believe it will be a most useful tool in the days that lie ahead in meeting the arguments of liberalism, modernism, and evolution. Thanks for the hard work! --Max Berlen Murphy

Users Review

From reader reviews:

Larry Carvajal:

This Convicted: A Scientist Examines the Evidence for Christianity book is simply not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is actually information inside this book incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. This particular Convicted: A Scientist Examines the Evidence for Christianity without we recognize teach the one who reading it become critical in imagining and analyzing. Don't always be worry Convicted: A Scientist Examines the Evidence for Christianity can bring any time you are and not make your carrier space or bookshelves' turn out to be full because you can have it in the lovely laptop even

mobile phone. This Convicted: A Scientist Examines the Evidence for Christianity having excellent arrangement in word in addition to layout, so you will not sense uninterested in reading.

Beverly Barber:

Reading a publication can be one of a lot of exercise that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new information. When you read a e-book you will get new information since book is one of a number of ways to share the information or perhaps their idea. Second, reading a book will make you more imaginative. When you reading through a book especially tale fantasy book the author will bring someone to imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Convicted: A Scientist Examines the Evidence for Christianity, you can tells your family, friends as well as soon about yours e-book. Your knowledge can inspire others, make them reading a reserve.

Ralph Smith:

People live in this new day time of lifestyle always attempt to and must have the spare time or they will get wide range of stress from both way of life and work. So , when we ask do people have free time, we will say absolutely indeed. People is human not just a robot. Then we inquire again, what kind of activity do you have when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading textbooks. It can be your alternative within spending your spare time, often the book you have read will be Convicted: A Scientist Examines the Evidence for Christianity.

Hattie Godfrey:

This Convicted: A Scientist Examines the Evidence for Christianity is great reserve for you because the content which can be full of information for you who always deal with world and still have to make decision every minute. This particular book reveal it data accurately using great coordinate word or we can state no rambling sentences within it. So if you are read the idea hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but tough core information with attractive delivering sentences. Having Convicted: A Scientist Examines the Evidence for Christianity in your hand like getting the world in your arm, information in it is not ridiculous one particular. We can say that no guide that offer you world within ten or fifteen minute right but this guide already do that. So , this can be good reading book. Hello Mr. and Mrs. busy do you still doubt in which?
