Metric Pattern Cutting for Children's Wear and Babywear By Winifred Aldrich

This fourth edition of *Metric Pattern Cutting for Children's Wear and Babywear* remains the standard text book but has three majorimprovements.

First, the sections have been re-organised to reflect changes in producing and marketing children's clothes. Today's popularity of easy-fitting styles and knitted fabrics means that basic *'flat' pattern cutting* is used to construct the majority of children's wear and babywear and this type of cutting is therefore emphasised in this new edition. Shaped blocks and garments, cut to fit the body form, are still included, and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes. The book now clearly separates the sections useful to student beginners (Parts One, Two and Three), and also offers more advanced or specialist sections for students who wish to pursue a career in children's wear or for designers working in the different manufacturing sectors of the trade.

The second change in this fourth edition is the introduction of colour coding to the sections; this makes it easier to identify specific processes in the book and enhances the illustrations.

Finally, the size charts have been revised to reflect the changes in body sizing. The clear division of the boys' and girls' measurements in the charts has been in response to the way clothes are marketed and to co-ordinate with European size charts. 'Plus' charts for heavier children have also been added.

Editorial Review

From the Back Cover
Hundreds of stylish illustrations and clear, concise instructions are used to illustrate this flexible system of pattern cutting, offering both students and designers the means to achieve original, well-cut designs. The children's clothing market has changed remarkably during the last decade, and this standard work has been revised to reflect new developments, including the increasing importance of the teenage customer.

This fourth edition of *Metric Pattern Cutting for Children's Wear and Babywear* now uses colour to differentiate the main groups of patterns and with its tried and tested layout is an essential purchase for students of fashion and design.

About the Author
Winifred Aldrich is a practising fashion designer, experienced in both the industry and education, and is now working in computer-aided design in her own studio. She was previously a lecturer in Loughborough and London for 14 years and is continuing her research at The Nottingham Trent University. Her books on pattern cutting have become bestsellers.
